NIRAJ SB

B.Tech Information Technology Student

sbniraj2006@gmail.com | +91 8778613949 | Guduvanchery, Chennai, India

Portfolio | **GitHub** | **LinkedIn**

Professional Summary

Information Technology undergraduate (B.Tech, expected 2027) with hands-on experience in Python, Java, JavaScript, SQL, and Zoho CRM automation. Built 3 projects spanning AI-powered information extraction, cloud security risk evaluation, and workflow automation. Seeking a software engineering or applied AI role.

Experience

CRM Development Intern, Zoho — June 2025 – July 2025

- Developed and customized Zoho CRM modules to support business workflows during a 2-month internship.
- Automated business workflows using Deluge scripting and JavaScript, reducing manual operations.
- Built interactive CRM widgets with custom functionality to improve user experience and workflow efficiency.

Education

B.Tech in Information Technology, RAJALAKSHMI ENGINEERING COLLEGE — 2023 – 2027 (Expected)

Higher Secondary Education, VIDYA MANDIR ESTANCIA — 2021 – 2023

Technical Skills

Programming Languages: Python, Java, JavaScript, SQL
Web Technologies: HTML, CSS, Node.js
Databases: MySQL, MongoDB
Libraries: NumPy, Pandas
Tools & Platforms: Git, GitHub, Zoho CRM, Deluge
APIs: REST API, FastAPI, API Integration

Projects

AI-Based Framework for Security Risk Evaluation in Multi-Cloud Environments [GitHub]

- Designed an AI-based framework to evaluate security risks across 3 major cloud platforms: AWS, Microsoft Azure, and Google Cloud.
- Built a unified attack graph modeling cloud assets, vulnerabilities, access permissions, and network relationships.
- Implemented Graph Neural Networks (GNN) and Bayesian inference for contextual risk scoring and attack-path prioritization.

Technologies: Python, NetworkX, NumPy, SciPy, Graph Neural Networks, Bayesian Inference

LifeSync [GitHub]

- Built a Python CLI application that converts natural-language daily routines into structured JSON using the Google Gemini API.
- Implemented AI-based information extraction that asks follow-up questions to identify missing details.
- Developed structured user routine profiles generated directly from free-form text input.

Technologies: Python, Google Gemini API, JSON

Smart Bus Booking System

- Built a bus booking management system on Zoho CRM with 3 custom modules for buses, routes, and passengers.
- Automated seat allocation, booking validation, and real-time booking updates using Deluge scripting and JavaScript.
- Created an interactive seat-selection interface with gender-based adjacency rules to improve the booking experience.

Technologies: Zoho CRM, Deluge, JavaScript, HTML

Certifications

- Advanced Algorithmic Thinking with Python
- SQL Essential Training
- Java: Advanced Concepts
- Communicating with Confidence
